**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

32 Fruit Street  
Boston, MA 02114

Exception: The MGH Subcommittee on Research Animal Care (SRAC) approved an exception regarding housing space for individual pigs. Pigs transplanted with organs or pigs that serve as fetal tissue donors and that weigh between 100-130 Kg are occasionally maintained in a barrier facility. Those pigs are kept in the largest pens available that provide only 25 square feet of floor space. This cage floor area is considered adequate for conventional pigs up to but not exceeding 100 Kg, according to the "Guide for the Care and Use of Laboratory Animals" (the *Guide*; National Research Council, 1996). Staff veterinarians from the Center for Comparative Medicine review this situation with the Principal Investigator and examine the pigs in question on an as needed basis. No adverse effects have been observed regarding the health of these animals. The SRAC finds that pigs over 100 Kg body weight to be sufficiently comfortable in these pens and are able to assume all normal body positions without complications.

Exception: The SRAC approved an exception to the *Guide* for providing feed on the cage floor for rodents, including those covered by the Animal Welfare Act, under specific circumstances. The justifications for this exception are to provide access to feed for animals that may have had surgery or neurodegenerative conditions that limit their movement, and for hamsters that may be debilitated during the course of a protocol and cannot easily reach feed normally provided in overhead hoppers.

Exception: The SRAC approved an exception for baboons maintained in intensive care following an organ transplant. During their recovery, some animals may not be acceptable candidates for chemical sedation that is required to move them to clean cages. Thus, these animals may remain undisturbed and not transferred from their recovery cage for up to 21 consecutive days post-surgery, versus the maximum 14 days provided in the Guide and Animal Welfare Act. Spot cleaning of cage bars and switching to clean cage pans will be performed as needed, in the meantime.

Exception: The SRAC approved an exception for non-human primates enrolled in studies that require restricted fluid intake for performance of complex behavioral tasks. Animals that are not fluid controlled usually will not work or will only work for periods of time so brief as to not be useful for training and recording. For some studies, this may require access to drinking water only once per day. This is an exception to the Animal Welfare Act that states nonhuman primates must have free access to water at least twice each day for at least one hour at each time (9 CFR, Ch.1, Part3, Subpart D, §3.83). These animals are closely monitored by veterinary staff during the study to ensure animal welfare is maintained. Duration of restricted fluid intake is limited to the minimal time needed to accomplish the task, accompanied by mandatory 'vacation' periods that provide free access to oral fluids for at least two consecutive weeks at least every 6 months.

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

## Exception to Standards

Registration Number: 14-R-0019

We request that our previously filed "exception to standards" be maintained for up to fifty-five (55) of our Non-Human Primates to receive water on a daily schedule that is less than the minimum requirement under the regulations in section 3.83. This section states "Potable water must be provided in sufficient quantity to every nonhuman primates, it must be offered to them as often as necessary to ensure their health and well-being, but no less than twice daily for at least 1 hour each time, unless otherwise required by the attending veterinarian or as required by the research proposal approved by the Committee at the research facilities."

As four of our HMS investigators are offering juice rewards to NHPs for behavioral studies with awake macaques at less than the above minimum for water, we have an exception to section 3.83 as described and institutionally approved by the Harvard Medical School IACUC. We ask that this exception to 55 Non-Human Primates be so noted in our 2007 Annual Report and maintained through 2008. During the 2007 USDA reporting period, only 32 macaques were actually water restricted.

Exceptions to the Animal Welfare Act approved by the IACUC at Northeastern University 14-R-0021

The IACUC has approved exceptions to the AWA on two protocols. The PI has been allowed to go up to 18 days between cage changes of singly housed hamsters, to house them in light-tight ventilated chambers to alter light dark cycles, and to expose them to various lengths and intensities of light and darkness.

The hamsters are housed in wheel running cages for circadian rhythm experiments. The PI feels that a cage change during an animal's free running period in constant conditions induced activity can cause a phase shift or period change in its activity rhythm. In many experiments, phase and period are the critical measurements and the timing of a cage change is essential so that the research data is not impacted. This PI has been given permission to house hamsters in constant dim light to measure the free running times of the hamsters in the absence of external rhythmic factors, i.e. light cycles. A rhythmic light dark cycle will not allow for this information to be gathered. Every effort is made to design experiments to accommodate frequent cage changes, but occasionally a cage will be not be changed for a period of 18 days.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**Re: USDA 2006 Annual Report of Research Facilities**

Please find enclosed the Annual Report of Research Facilities for GTC Biotherapeutics (# 14-R-0074). This report covers the time frame from October 1, 2006 through September 30, 2007 as required by the Animal Welfare Act regulations.

GTC has one IACUC approved exemption relative to major multiple operative procedures. Per the USDA exemption approval letter dated January 28, 2005, please find below a detail of the number of animals for which multiple survival procedures have been performed during the dates indicated:

1. October 1, 2006 – September 30, 2007: 263 goats received multiple operative procedures.

Additionally, all of the requirements as put forth in the USDA exemption approval letter are being followed relative to animal identification, limitation on surgical number, maintenance of animal records, and periodic IACUC review.

Please fell free to contact myself or [REDACTED] if you have any questions or if there is any additional information you require.

Sincerely,

[REDACTED]

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

(AUG 91)

FORM 18-23 (OCT 88), which is obsolete.)

*RJW*

Members of McLean Hospital's Institutional Animal Care and Use Committee have approved two exceptions to the AWA standards during the past year:

1. An exception was granted to allow one group 4 primate to be housed in operant cages that are smaller than the standards allow (ADARC Primate Facility). The IACUC agreed that these cages compensate for their slightly smaller size by providing animals additional enrichment via the availability of various operant tasks.

**From the Minutes of October 10, 2007**

[REDACTED] - Rhesus and Cynomolgus Monkey Project Summary, Protocol #06-4/2-11. The memo "Cage Dimensions for Housing Nonhuman Primates" from [REDACTED] to the McLean Hospital IACUC, dated September, 2007, requesting that the existing operant cages (5.4 square feet x 34.75 inches high) be approved as adequate housing for Group 4 monkeys up to 13.3 kilos was re-approved by a vote of ten in favor, one against, with one recusal. It was noted that this exception presently only affected one monkey, weighing 12.2 kg.

2. An exception was granted allowing cage washing of 35 operant cages on a monthly basis, rather than bi-weekly, basis (ADARC Primate Facility). These cages are designed to accommodate monkeys that have been fitted with chronic, indwelling intravenous catheters. The IACUC agreed that more frequent cage changing while animals are engaged in specific behavioral evaluations could negatively influence the physiology of the animal, and could also compromise drug delivery instrumentation while animals are on study.

**From the Minutes of October 10, 2007**

[REDACTED] - Rhesus and Cynomolgus Monkey Project Summary, Protocol #06-4/2-11. The memo "Frequency of Cage Washing" from [REDACTED] to the McLean Hospital IACUC , dated September, 2007, requesting an exception from the requirement for bi-weekly cage washing for 34 operant Primate cages in the Oaks Primate Facility was approved unanimously, with one recusal. The IACUC committee suggested that [REDACTED] continue compiling data on rates of infection of catheterized animals that have monthly cage cleaning.

The above minutes are key summaries of longer Committee discussions on these exceptions. In addition, referenced memos and documents provide additional details on the Committee's deliberations.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs			116		116
7. Hamsters					
8. Rabbits			338		338
9. Non-Human Primates					
10. Sheep			21		21
11. Pigs			17		17
12. Other Farm Animals					
Goats			4		4
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). **A summary of all the exceptions is attached to this annual report.** In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and appropriate Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
