ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**United States Department of Agriculture
Annual Report of Research Animal Facility (Form 7023)
10/1/05 – 9/30/06**

**Stanford University
Registration #93-R-0004**

Exceptions to Standards and Regulations under the Act:

Multiple Major Survival Surgeries (MMSS):

1. Six Investigators were granted Stanford IACUC approval to perform two survival surgeries on non-human primates as part of the same experimental protocol. All surgeries were performed with appropriate anesthetic agents. During this reporting period, seventeen (17) nonhuman primates have been used.

Housing/Cage Changing:

2. One Investigator was granted Stanford IACUC approval to house hamsters as continuous breeding male/female pairs. During this reporting period, thirty-six (36) hamsters have been pair housed.
3. One Investigator was granted Stanford IACUC approval to change hamster and ground squirrel cages at intervals up to 14 days to prevent disruption of studies. During this reporting period, six (6) ground squirrels have been used.
4. One Investigator was granted Stanford IACUC approval to house hamsters in cages that are 5.5 inches tall. As new cages are purchased, they will be replaced with cages that are 6 inches tall. During this reporting period, one-hundred and eighty-two (182) hamsters have been housed in 5.5 inch tall cages.
5. One investigator was granted Stanford IACUC approval to cross-tie sheep for the duration of chronic experimental procedures. Animals are able to move within their pens (forwards, backwards, and side to side), with the exception of turning around, and are able to lie down. As per the APHIS Notice in the Federal Register Vol. 65, No. 23, 5301-5303, Feb 3, 2000, the Stanford IACUC approved this scientifically justified restriction to the animal's space. During this reporting period, fifty-eight (58) sheep were used.

Water Control:

6. Four Investigators were granted Stanford IACUC approval to utilize carefully monitored water control as a motivational tool. During this reporting period, twenty-four (24) nonhuman primates have been used.

Physical Restraint:

7. Four Investigators were granted Stanford IACUC approval to utilize non-human primate chair restraint during experimental procedures. The animals were removed at the end of the recording sessions. The average length of the recording sessions was four hours. During this reporting period, twenty-five (25) nonhuman primates have been used.

13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Summary of IACUC-Approved Exceptions

1. An investigator was granted Salk IACUC approval to perform multiple survival surgeries on non-human primates as part of the same experimental protocol. During this reporting period five animals were used.
2. An investigator was granted Salk IACUC approval to perform multiple survival surgeries on non-human primates as part of the same experimental protocol. During this reporting period nine animals were used.
3. An investigator was granted Salk IACUC approval to perform multiple survival surgeries on non-human primates as part of the same experimental protocol. During this reporting period two animals were used.
4. An investigator was granted Salk IACUC approval to perform multiple survival surgeries on non-human primates as part of the same experimental protocol. During this reporting period six animal s were used.
5. An investigator using non-human primates was granted Salk IACUC approval to utilize carefully monitored water control as a motivational tool. These animals were also chaired during experimental procedures and were removed at the end of the recording sessions (the average length of these sessions was six hours). During this period six animals were used.
6. An investigator using non-human primates was granted Salk IACUC approval to utilize carefully monitored water control as a motivational tool. These animals were also chaired during experimental procedures and were removed at the end of the recording sessions (the average length of these sessions was four hours). During this period ten animals were used.
7. An investigator using non-human primates was granted Salk IACUC approval to utilize carefully monitored water control as a motivational tool. These animals were also chaired during experimental procedures and were removed at the end of the recording sessions (the average length of these sessions was four hours). During this period two animals were used.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Summary of Exemptions from Social Interaction or Environmental Requirements Oct 1, 2005-Sept 30, 2006

- 1) Sheep on Left Ventricular Assist Device study. Sheep will be cross tied with a halter for the duration of the study (7 days-16 days). Justification was that the electrical connections to the device could not be chewed on by the study animal or by other animals or sudden death would occur. The sheep was provided with analgesics and could lie down, stand up and walk 4 steps forward, backward and sideways. The IACUC approved for 30 days at a time with the provision that no adverse events occurred. The sheep were provided with a "sitter" technician 24 hours a day for 7 days. The Exemption for each sheep was signed by IACUC members on 11/14/05 for sheep# 5199, 12/12/05 for Sheep#5204, 1/09/06 for sheep#5206, 2/06/06 for sheep#5208, 2/13/06 for sheep #6010, 2/27/06 for sheep #5203, and on 4/03/06 for sheep # 6025. Each exemption had a re evaluation date, but none were necessary due to termination of the individual animal study prior to the 30 days.
- 2) Dogs that were implanted with subcutaneous pacemakers with leads placed on the ventricular walls required that the dog be kept quiet and not be housed with another dog or play with another dog (as is our usual policy on exercise and housing of dogs). The dogs were being paced into heart failure and that also requires that the dog remain relatively quiet without excessive exercise in order to avoid development of the clinical signs of cough, dyspnea, and Ascites. The dogs were housed individually in runs measuring 4'X 6'and had 3-4 times daily quiet interaction with the animal care staff consisting of petting ,grooming, slow walking and daily physical examinations. The IACUC approved for 30 days with review at that time if the time needed to be extended. IACUC met and reviewed on 4/14/06, 5/03/06, 5/11/06, 5/16/06, 6/21/06, and 6/30/06. Actual observations by the members, other than the chairman and the veterinarian who observed the dogs daily, occurred on 6/21/06.
10 dogs total

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)

13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
 - 2) Each principal investigator has considered alternatives to painful procedures.
 - 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
 - 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL (Chief Executive Officer or Legally Responsible Institutional official) I certify that the above is true, correct, and complete (7 U.S.C. Section 2143)

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)

FACILITY LOCATIONS(sites)

See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals	Mice Rats Crayfish Worms Cichids	5 10 39 18 18 1100	24 18 18 1100		61 18 18 1100

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

USDA Annual Report of Research Facility – Supplement

**Supplement to the USDA Annual Report of Research Facility
For the University of California, Berkeley
APHIS FORM 7023 (AUG 91)**

Reporting Period October 1, 2005 to September 30, 2006

Section 3 of the Annual Report of Research Facility (APHIS FORM 7023) (Section 2.36(b)(4) of the Animal Welfare Act): Location of Facilities for Housing, Teaching and Research:

The following facilities are categorized by their dedicated usage. All facilities have more than one usage.

Facility	Housing	Research	Teaching
Field Station for Behavioral Research	✓	✓	✓
Life Sciences Addition	✓	✓	✓
Minor Hall (School of Optometry)	✓	✓	
Northwest Animal Facility	✓	✓	✓
Valley Life Sciences Building	✓	✓	✓

Part 3 of the Assurance Statement of APHIS Form 7023 (AUG 91) (Section 2.36 (b)(3) of the Animal Welfare Act): IACUC Approved Exceptions to Standards and/or Regulations

Approved exceptions to standards and regulations of the Act during the reporting period included the following:

Multiple Major Survival Surgeries

The IACUC will not permit multiple major survival surgeries on a single animal unless the surgeries are related and necessary components of a research project. During this reporting period, multiple major survival surgeries were performed in six projects approved by the IACUC.

The first two projects are studies of neural processes with macaques. In order to conduct electrophysiological recordings, each animal must have: 1) a head-post anchored to the cranium to prevent head movements during recording and 2) a recording chamber placed over a small opening in the skull to allow access to the cortex. The surgery to attach the recording chamber is not undertaken until and unless the animal is able to perform the required behavioral tasks. This usually occurs several months after the head-post is implanted. During this reporting period seven animals underwent multiple surgeries.

The third project is also a study with macaques. In order to conduct electrophysiological recordings in this study, each animal must have: 1) microelectrode arrays inserted into a series of small microports and 2) a head positioner anchored to the cranium to help stabilize the head during recording. The head positioner is placed during the surgery for the microports if time permits. In the event a second surgery is required there is at least a two-week interval between surgeries. During this reporting period no animals underwent multiple surgeries.

In the fourth and fifth projects, heat-sensitive transmitters are implanted in the peritoneal cavities of hamsters to provide a constant monitoring of body temperature during hibernation and other studies. Because the duration of some studies exceeds the lifetime of the transmitter's batteries, a second abdominal surgery must be performed on some animals to replace the batteries. In some animals, baseline body temperatures are recorded from the telemeters for several weeks and then a brain lesion (which requires a craniotomy) or a gonadectomy is performed to determine the effects of these procedures on baseline body temperature, food intake, and other physiological parameters. During this reporting period, seventy-two hamsters had both the transmitter and an additional surgery.

The sixth project studies sexual differentiation in the spotted hyena. A captive-breeding colony of hyenas is maintained for this research and currently consists of 31 animals. One aspect of the project involves terminating pregnancies at various times to study the sexual differentiation process and its hormonal correlates. Since there are a limited number of breeding females, the investigator has received permission from the ACUC to carry out multiple Cesarean sections (C-sections) on individual females to achieve the minimum sample sizes for statistical validity. The minimum interval between surgeries is 6 months, and each C-section must be approved by the Office of Laboratory Animal Care (OLAC) veterinary staff on a case-by-case basis. During this reporting period, no hyenas (that previously had a C-section) underwent an additional Cesarean section.

Physical Restraint

Prolonged physical restraint of alert animals is prohibited unless essential to research objectives. All such restraint must be justified to and approved by the ACUC. In addition, the restraint device must be evaluated and approved by OLAC veterinary staff prior to use. The ACUC approved four projects that require physical restraint of unanesthetized animals.

The first project is studying the transmission of Lyme disease. Wild rodents are partially restrained in tubular wire mesh cages for 12 to 24 hours to allow ticks to attach to them. Animals can move backward and forward, but side-to-side motions are restricted to prevent them from removing the ticks. Previous studies have shown that 12-24 hours is the minimum period required for effective tick attachment and disease transmission. Carrot or potato slices are placed in the cages to provide a source of food and water. OLAC veterinary staff have observed and approved the restraint procedure. Thirty-two wild rodents underwent physical restraint during this reporting period.

In three studies, electrophysiological recordings are taken from the cortex of awake macaques trained to perform specific behavioral tasks. In each project, the animal sits in a specially designed primate chair that allows it to freely move its limbs and adjust its posture while in a head restraint. In-chair training is initiated several months before the actual study begins, to allow the animal to adjust to an increasing duration of restraint. Stress to the animal is minimized as the animal controls the initiation of each trial by an eye movement or a key press. The recording for any day ceases when the animal stops performing the task. The animal is chaired between 2-6

hours per day, 5-7 days a week for studies that may last 4-6 weeks. The committee has determined that this is the minimum period necessary to permit reliable data collection from certain brain sites. Because the animals are performing operant tasks, task initiation is always under their control, and they may work at their own pace and cease work when they are satisfied. Animals are monitored continuously while they are in the chair, and are removed from the restraint if they cease working before the scheduled end of a session. OLAC veterinary staff have observed and approved the restraint procedure. During this reporting period, fourteen animals underwent physical restraint.

Housing

The ACUC approved two exceptions to requirements for housing dwarf hamsters. The first is an exception to the 6-inch interior height requirement of primary enclosures used to confine hamsters. Dwarf hamsters are housed in opaque 7 x 11 x 5 inch cages with wire lids, with ample room for postural adjustments. These cages were purchased prior to August 15, 1990 and provide approximately 65 square inches of floor space. During this reporting period, 405 hamsters were housed in these cages. The second is an exception to the requirement that a nursing female hamster, together with her litter, be housed in a primary enclosure that contains no other hamsters. Breeding dwarf hamsters are pair-housed in male-female units, a standard husbandry practice for this species. During this reporting period, 135 female hamsters were pair-housed in male-female units. These 135 hamsters were a subset of the 405 hamsters mentioned above. Variances from the USDA have been granted for both of these exceptions to housing requirements.

Sanitation

The ACUC has approved one protocol that does not conform to the sanitation schedules recommended by the Guide. The project is studying the behavior of captive tuco-tucos. The animals are housed in artificial burrow systems constructed of clear Plexiglas tubing interspersed with clear plastic boxes that are used as food, nest, and refuse chambers. The diameter of plastic tubing (3 in) simulates the diameter of the animals' tunnels in nature. The dimensions of nest and refuse chambers (8 x 8 x 6 in) are also based on field measurements of burrow systems. Food chambers (8 x 12 x 16 in) are elevated approximately 5 in above the remainder of the burrow system to simulate emerging above ground to forage. To avoid disrupting females with litters, spot cleaning of the nest and food boxes is performed daily. All plastic boxes in a burrow system are inspected and wet bedding is removed and clean bedding replaced as needed. Once per week all nest and food chambers are emptied and sanitized. Once every 6-8 weeks, each burrow system (Plastic tunnels and tunnel junctions) is entirely dismantled and sanitized. This schedule has been shown to maintain an adequate level of sanitation. Sixty-three tuco-tucos were involved in this project during the reporting period.

Temperature Standards

The ACUC approved two projects studying hibernation and torpor where Siberian and Syrian hamsters are housed in specially constructed, walk-in environmental chambers for up to 5 months at temperatures ranging from 5-21° C (41-70° F). The natural habitat of these hamsters frequently sees air temperatures as low as -40° C. 475 hamsters were housed in the environmental chambers during this reporting period.

Food or Fluid Regulation

Currently, three projects approved by the ACUC involve regulating water in experimental studies. These are electrophysiological recording projects with non-human primates. The projects require regulating the water of the animals during training and recording procedures. The animals are on a schedule that regulates their access to water to daily laboratory sessions of up to 6 hours per day during training and neurophysiological recording. Juice or water rewards are used during these times as a positive reinforcement in shaping the animal to perform the required tasks using operant conditioning techniques. Solid food cannot be used as a reward because the act of chewing involves facial and cranial muscles that preclude the stability required for successful recording from cortical neurons. When animals are on water regulation, water intake is recorded to ensure that the animal gets sufficient daily fluid. Supplemental hydration is provided if clinical signs of dehydration are observed. During this reporting period, fourteen animals underwent fluid restriction.

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

See reverse side for additional information.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
 - 2) Each principal investigator has considered alternatives to painful procedures.
 - 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.

has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other

Exceptions to the Regulations
Approved by LyChron's Animal Research Committee (LyChron's IACUC)
USDA Year Sept 30, 2005 – Oct 1, 2006

ARC #759 approved by Full Committee Review

Species – Ovine

Number of Animals – 11

Approved Exception to the Following Regulation- 9CFR Ch 1 section 3.128 “Enclosures shall be constructed and maintained so as to provide sufficient space to allow each animal to make normal postural and social adjustments with adequate freedom of movement.”

The goal of this study was to test the company’s central venous catheters ability to monitor continuous cardiac output and the oxygen content of mixed venous blood. These catheters provide hospital care givers with accurate vital patient statistics. The intent of this proposal will allow the company to continue with manufacturing and marketing products that help improve the safety and effectiveness of patient care.

Evaluations of the device performance were made continuously for 96 hours post implant. Post-operative evaluations of the test catheter required hard wiring to a monitoring system. As in clinical practice, a saline flush was also required to keep the catheter open for the entire post-implant evaluations. The success of the study depended on keeping the animal from disturbing both the catheter wiring and the flush lines. With input from three veterinarians and the IACUC committee, it was determined that the success of the study would require restraining the animals in such a way that prevented the animals from chewing or pulling out the devices. This consisted of a halter and cross ties which prevented the animal from turning around. The restraint did not remove the animal’s ability to lie down. Feed and water were rearranged so they were accessible to the animals during the 96 hour dwell time. Normal daily cleaning was performed of the animal run.

An extensive pre-conditioning (5-7 days, with gradual increase of time spent tied) was performed prior to the procedure to allow the animal’s time to accustom to the change in husbandry space.

This report is required by law (7 USC 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

See reverse side for additional information.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					—
5. Cats					—
6. Guinea Pigs					—
7. Hamsters					—
8. Rabbits					—
9. Non-Human Primates					—
10. Sheep					—
11. Pigs		2			2
12. Other Farm Animals					—
13. Other Animals					—

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Species and Numbers:

Rhesus Macaque (6)

Reportable Exceptions - Fluid Regulation - Section 3.83

The goal of our research is to understand the operation of the working brain relative to vision and eye movement. One commonly accepted way to do this is to record the behavior of animals and the activity of single neurons during behavior. In our laboratory, and many others around the world, we accomplish this goal by training monkeys to perform simple tasks with fluid or food reinforcements. Eliciting good behavioral performance over a period long enough to acquire meaningful data requires strong motivation on the part of the animal. A successful, humane, and scientifically valid way to attain this level of motivation is through fluid or food reward. We voluntarily report this exception to be conservative in our reporting.

13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits					
9. Non-Human Primates					
10. Sheep					
11. Pigs	∅	∅	∅	∅	∅
12. Other Farm Animals					
13. Other Animals				Note: The facility is not yet operational and no animals have been used or housed within the facility <i>SC 21Sep06</i>	

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

FACILITY LOCATIONS(sites)

VA MEDICAL CENTER (662)
SAN FRANCISCO, CA 94121

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters			30		30
8. Rabbits			45		45
9. Non-Human Primates					
10. Sheep			15		15
11. Pigs			12		12
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
