REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs	5	0	16	0	16
5. Cats	0	0	11	0	11
6. Guinea Pigs	5	69	46	0	115
7. Hamsters	0	900	43	0	943
8. Rabbits	0	89	372	0	461
9. Non-Human Primates	46	116	12	0	128
10. Sheep	1	5	17	0	22
11. Pigs	0	3	40	0	43
12. Other Farm Animals					
Goat	0	0	5	0	5
13. Other Animals					
Ferret	0	191	12	0	203
Mastomys	16	17	0	0	17
Peromyscus	75	162	0	0	162

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL

October 1, 2005 – September 30, 2006
Explanation for IACUC Approved Exceptions to USDA Regulations
Yale University 16-R-0001

Feeding

Twenty-nine Macaca mulatta, Category C, underwent food regulation to motivate learning. Animals were given a reduced ration of monkey chow during the testing period of five days per week. During this time, their diets were supplemented by food rewards earned during testing and by food treats given as part of the enrichment program. The investigator and the veterinary staff monitored the animals' health status. Daily assessments included body condition, food consumption, behavior, and hydration status. Animals were weighed weekly and returned to full feed when not on study. Animals did not exhibit any overt discomfort or distress.

Watering

Three Macaca mulatta, Category C, and three Macaca mulatta, Category D, underwent water regulation to enhance performance and motivation to learn and perform complex tasks. Fluid intake was sufficient to maintain the animals' health and well-being. It was accomplished by permitting the animals to earn fluid to satiety each day during behavioral training and testing, providing *ad libitum* chow and treats and stopping fluid regulation when animals were not on study. Daily assessments included body condition, food consumption, behavior, and hydration status. Animals were weighed weekly and did not exhibit any overt discomfort or distress.

NOV 17 2006

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A.)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats			14		14
6. Guinea Pigs			15		15
7. Hamsters	118				118
8. Rabbits		187			187
9. Non-Human Primates		3			3
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

RE: Attachment to Form 7023, Reporting Year 2006.**2006-231 -**

National Institutes of Health/DHHS
Function of Midbrain Structures in Oculomotor Control

3 Non-Human Primates on water control!

Full access to water is regulated in a manner to ensure the animal is adequately motivated to perform traditional operant conditioning paradigms. This exception was approved by the (IACUC), after their determination of scientific justification.

2005-188 -

National Institutes of Health/DHHS
Neural Mechanisms of Binaural Hearing

2 Rabbits, prolonged restraint!

The rabbits are gradually acclimated to the restraint procedure. The rabbit is placed in a body stocking made of elastic dancer tights and placed in a Plexiglas cradle. During recording, the head is restrained by clamping the skull bar and the custom-fitted ear molds are inserted. Initially the rabbit sits in the cradle for 15 minutes without the ear molds and without its head being restrained. Over 5 days, this period is gradually increased to 2 hr, the ear molds inserted, and the head clamped. All animals tested so far adapt to this situation without any overt signs of discomfort. Since there are no pressure points, pain is avoided. We have not noticed any increased resistance or struggling while placing the animal in the body stocking suggesting that this procedure is not highly aversive to the animal. This exception was approved by the (IACUC), after their determination of scientific justification.

Sincerely

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 30324.)

ANIMALS COVERED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)					
A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + E)
4. Dogs	Ø	Ø	30	Ø	30
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits	2	Ø	35	Ø	37
9. Non-Human Primates					
10. Sheep					
11. Pigs					
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
 - 2) Each principal investigator has considered alternatives to painful procedures.
 - 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
 - 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Subject: Request for exemptions from exercise for dogs under protocol #359
Date: March 8th, 2006

This memo is to request an annual exemption from exercise for dogs under BRC-IACUC approved Protocol #359 – Pharmacokinetic Studies with New Chemical Entities in Dogs for the period of October 2005 through September 2006. Typical PK experiments run up to 72 hours but may run as long as 168 hours. During the experiment animals are maintained in one over one caging in the animal facility. This is a safety measure that allows the animals to be closely monitored for potential adverse reactions as well as collection of physiological samples. Typically 3-9 dogs make up an experiment, allowing olfactory and auditory contact and when possible visual contact. Animals in cages will be provided with additional human contact by both the investigators and the facility staff consisting of positive physical contact and food rewards (if not contraindicated by study protocol) during the period they are single housed without exercise. At the end of the study, dogs are returned to the regular colony.
