MOTON FIELD RESEARCH STATION

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A.)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs	000	016	245	000	261
5. Cats	000	000	000	000	000
6. Guinea Pigs	000	000	000	000	000
7. Hamsters	000	057	000	000	057
8. Rabbits	000	000	000	000	000
9. Non-human Primates	000	000	000	000	000

Horse/Ponies	000	035	000	000	035
14. Other Farm Animals					
Cattle/Calfes	000	058	000	000	058

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

SOUTHERN RESEARCH INSTITUTE

November 30, 2000

Registration Number: 64-R-0001

Attachment to Annual Report of Research Facility (APHIS Form 7023)

Explanation for animals classified under Item E of APHIS Form 7023:

There were 33 dogs that were noted in the "pain and distress without treatment" category because they were administered a drug, other chemical, or biological agent that caused pain, distress, or interfered with normal functions because of its composition. The objectives of these studies included the determination of drug-induced toxicity. In all cases the reason for withholding such agents as tranquilizers, analgesics, or anesthetics was that their use would have confounded the meaningful interpretation of drug safety results from the studies and/or eliminated the possibility of obtaining useful drug-induced toxicity data. Prior to approval of the use of a drug or biological agent in humans, the U.S. Food and Drug Administration (FDA) requires the submission of drug-induced toxicity data derived from both rodent and non-rodent mammalian species (Reference: 21 CFR, Part 312, 4-1-95).

Explanation of exceptions to the regulations and standards:

Two beagle dogs were housed under blue-green filtered light on a 12:12 light:dark cycle for 6 months. It was the opinion of the IACUC that this alteration in light conditions, while justified for scientific reasons, represented an exception to the intent of animal welfare regulations regarding lighting conditions. The purpose of the altered light regimen was to determine the role of natural light in producing unanticipated drug-induced skin pigmentation that developed following administration of a test compound. The dogs exhibited no evidence of physical or behavioral abnormalities as a result of the altered light regimen.
