REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A.	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs					
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits	1				
9. Non-Human Primates					
10. Sheep					
11. Pigs			8		8
12. Other Farm Animals					
13. Other Animals					
Rats	2				

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

**Summary of Exceptions
University of Illinois – Chicago
33-R-0018**

The Institutional Animal Care and Use Committee of the University of Illinois – Chicago has approved an exception to the minimum space requirements **in Subpart D Section 3.80 Primary Enclosures** of the Standards promulgated to implement the Animal Welfare Act for the temporary housing of male and female baboons (*Papio sp.*). The exception granted was that the male cage does not have to provide twice the minimal area required to house one animal during periods of breeding. This exception is for the period or time that a female baboon is placed in the male's cage for the purpose of breeding. This period generally does not exceed five days and the male cage contains 15 sq. ft. The exception was granted because the housing is only temporary in nature, and it is generally accepted practice for many species that the female is taken to the male's cage for breeding. It is the consensus of the veterinary staff that the current system provides adequate space for animals to engage in species specific interactive behaviors. During the last year, 9 animals were temporarily housed under this exception.

The Institutional Animal Care and Use Committee of the University of Illinois – Chicago has approved an exception for the requirements **in Subpart A Section 3.80 Exercise for Dogs** of the Standards promulgated to implement the Animal Welfare Act. The exception granted was that dogs maintained in radioisotope containment pens for the support of a specific radioisotope project would not be exercised though the pens were less than twice the minimum floor space required by 3.6(c)(1) of Subpart A. The exception was granted because of the physical properties of the radioisotope, duration of half-life, concern regarding environmental/facility contamination and that the containment pens in which the dogs under this exception were maintained were within 0.2 – 1.0 sq. ft. of the minimum requirement to preclude the necessity to institute an exercise program. Seven dogs were maintained under this exception for approximately 10 weeks. Animals under this exception were monitored by the veterinary staff during the course of the project and no health or behavioral problems were noted.

**IACUC-APPROVED EXCEPTIONS AND NUMBERS OF ANIMAL USED
FOR USDA-COVERED SPECIES FOR THE PERIOD 10/01/05 THROUGH 09/30/06**

ACUP 71684/71566 USDA Covered Species: Nonhuman Primate Number Used: 8

Variance: Water is not provided *ad libitum* during some parts of the study.

Rationale: These studies require rhesus monkeys to be motivated to perform simple behavioral tasks in anticipation of receiving fluid rewards. Thus fluids are sometimes restricted to the study sessions, where the animals are able to obtain fluids to satiety. The condition of the animals is closely monitored. They readily adapt to this schedule during active study periods. At other time fluids are provided continuously.

ACUP 71398 USDA-Covered Species: Nonhuman Primate Number Used: 11

Variance: Water is removed from the animals 7-10 hours prior to testing, thus water is not available at all times.

Rationale: The experimental design requires the animals to work for a juice reward by following a spot of light visually. Mild thirst increases the animals' interest and is not detrimental. Water is promptly returned following testing and animals are not allowed to become dehydrated.

ACUP 71565 USDA-Covered Species: Nonhuman Primate Number Used: 7

Variance: Water is not provided *ad libitum* during some parts of this study.

Rationale: This study requires nonhuman primates to perform simple visual-motor tasks (move a lever to move a cursor) in order to obtain fluid rewards. Thus fluids are sometimes restricted to study sessions, where the animals are able to obtain fluids to satiety. The physical condition and hydration status of the animals are closely monitored.

ACUP 71383/71443/71469 USDA-Covered Species: Hamsters Number Used: 1806

Variances: The IACUC has approved housing Siberian Hamsters in 5" high cages based on their size (average 35 grams) as permitted in the Regulations. Some of these animals are subjected to cooler than normal temperatures and some may have food and water supplies controlled during parts of the studies. A small number are subjected to visual impairment through the use of opaque contact lenses.

Rationale: Taller cages are not required for these diminutive animals, and the shorter cages are actually beneficial in that they permit the animals to reach and climb about on the cage lids. Cooler temperatures and controlled food and water are employed to produce the normal physiological changes which occur in these Siberian-native species in their natural habitat. Their health is closely monitored and no deleterious effects have been observed.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). **A summary of all the exceptions is attached to this annual report.** In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
